EIGHT
CUBIC METRE
BIN CAPACITY

MULTI-FEEDER

The heavy-duty design of the teaser bars, chains and drive system enable the wagon to handle denser more diverse feed types that require all-year round feeding.

HIGH STABILITY

The Multiskip Wagon is specifically designed for sheep and beef farmers in the steep terrain. It's robust construction and high tow-point give it high stability and anti-rolling features.

ANTI-CORROSIVE

Steel parts are power blasted, epoxy primed and coated with two pack urethane for corrosion resistance. Side panels are hot-dipped galvanized.
